

ESG Program Management

Environmental, Social & Governance

Give individuals control over their data, consent, and preferences with a single, end-user-facing portal.

Deliver dynamic experiences that maximize opt-ins and support first-party data capture

Capture and communicate consent and preferences from within Smart TVs, OTT applications and connected TV environments to support compliance

Collect consent through mobile apps and maintain records for compliance

Streamline audits with an extensive library of controls, visibility into control testing and status, and configurable workflows.

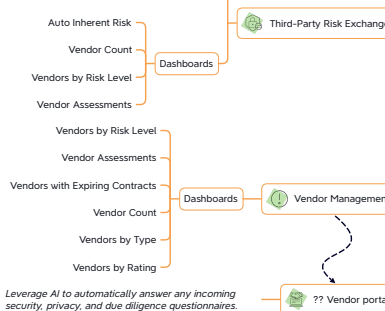

Proactively map, measure, and action IT and security risks to scale your risk management program.

Manage, monitor, edit, and update policies and notices to centralize policy development, run attestation campaigns, and conduct automated periodic review cycles.

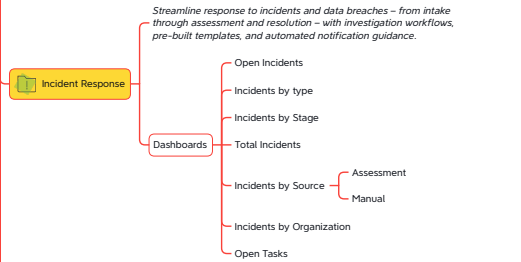

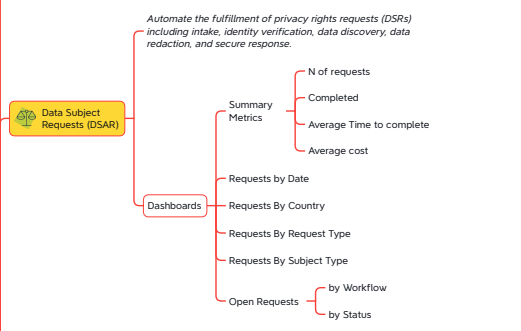

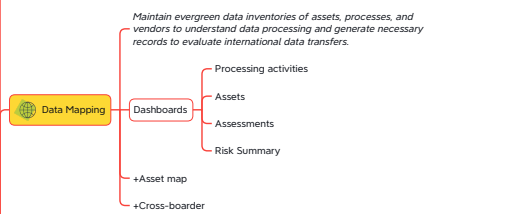

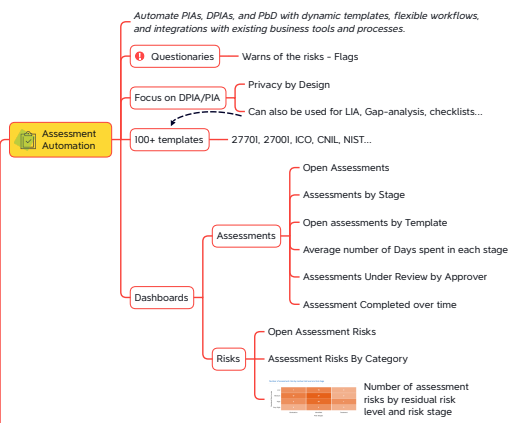

Automate workflows to streamline the third-party lifecycle, reduce third-party risks, and track controls with issue management.

Access cyber risk and ESG scores as well as risk analytics and control gap reports on thousands of third parties across 18 risk domains.

Privacy Management

Policy & Notice Management

Centrally manage privacy policies and notices with out-of-the-box templates, approval workflows, automated population of information, like RoPA and cookie lists, and central hosting across all digital properties.
