A GUIDE ON HOW TO BECOME A GLOBAL SECURITY LEADER

RESPONSIBLE

CYBER

INTRODUCTION

This is how we see ourselves sometimes: Inexperienced and Not ready

RESPONSIBLE

CYBER

INTRODUCTION

This is who recruiters and firms are searching for: Cyber Security Super Heroes

I wanted to share with you my feedback and experience, after my career in four continents and many countries. I have been through business and technical roles, which allowed me to have different views on leadership roles.

Main aspects to take in consideration, when you are aiming to be a leader are:

- Culture / People
- Technology
- Business / Operations
- Change

Recruitment firms consider that CISOs have two years lifetime in one company.

After two years, a breach will occur and the CISO will be replaced....

This perception and approach is not reflecting the real role of the CISO.

Roland Cloutier

“

It's a how-to guide for those men and woman who have decided to dedicate themselves as leaders in the diversified disciplines of security, risk and privacy.

However, it might be slightly misleading. If I were to focus only on those three simple words I believe I would be doing you a great injustice.

”

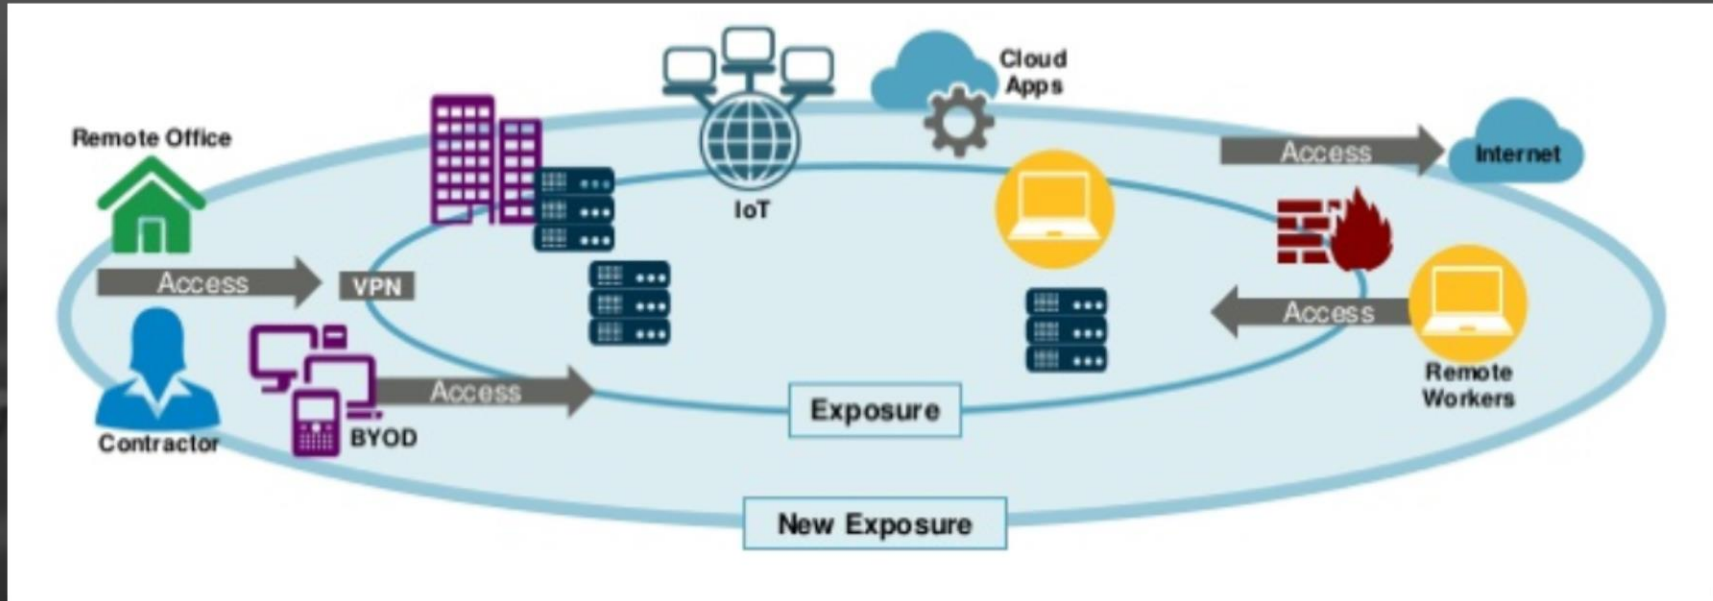

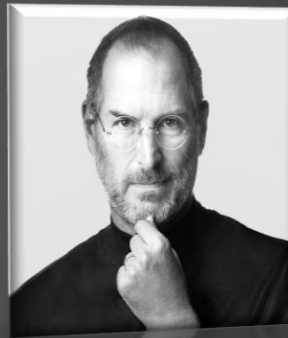

The security community has different challenges, including:

- Lack of available support to professionals in security management.
- Lack of sharing of real and tangible experiences and ideas.
- Lack of clear and actionable framework with implementation tips.
- Lack of inclusion and diversity.

“Nobody is born learned. Learning is to be acquired.”

MORE ATTACK OPPORTUNITIES ARE RAISING

“

Steve Jobs (1997)

It's faster in every case to talk to the server than it is my local hard disk... Carrying around these non-connected computers -- with tons of data and state in them -- is byzantine by comparison.

”
